

Property Investment – is all about timing...

Astute, successful property investors employ a counter cyclic strategy. Always buying when the market is taking a breather, selling when it peaks. Timing is critical, as is purchasing a property that is in harmony with the demands of its local market – not in conflict with it.

Join us for a **90 min briefing** where you will learn:

- How to profit from market cycles
- The power of principles of property selection
- The analytical approach for a successful outcome
- The golden rules of property investment
- How to best fund and structure your property investment for maximum returns
